

EverFlex

£19.52 free delivery for all orders placed this weekend. Orders placed after Sunday 13th of December will be subject to £2.95 P&P. Payment must accompany order.

Price valid until 30 Dec 2009 or while stocks last.

EverFlex Tablets (60)

EverFlex is a comprehensive nutritional supplement for healthy joints and connective tissues using 4 key natural ingredients. EverFlex (tablets) [Structural] offers the advantages of glucosamine, chondroitin and MSM in one convenient tablet. Numerous studies demonstrate glucosamine's effectiveness in protecting connective tissues and maintaining the integrity and mobility of joints. Glucosamine helps lubricate joints by replenishing synovial fluid, which promotes a joint's shock-absorbing properties. Chondroitin sulfate attracts fluid into the cartilage, making the cartilage more shock absorbent, drawing nutrients into the cartilage and promoting growth and normal tissue regeneration. It also helps keep undesirable enzymes in check. Methylsulfonylmethane (MSM) is present in many fresh foods, but it is easily destroyed during cooking, processing and as food sits in storage. Supplementing with this nutrient ensures an adequate supply. MSM contains about 35 percent sulfur by weight. Sulfur is an important structural component of the connective tissue that joins

Adults: Take 2 tablets twice daily with a meal.

Customer Testimonials I am a regular runner and go out most mornings for a half hour run before work. Earlier this year I noticed that my knees were giving me trouble. I have suffered with knee problems before however, having increased the amount of stretching I was doing after each run as well as buying a new pair of running shoes, my knees were still sore. It was really quite upsetting and I didn't want to stop doing something that I enjoyed so much. I had never taken any glucosamine tablets before and as I was a Nature's Sunshine customer already, I decided to give the EverFlex tablets a go. Although I initially thought they were predominantly for those suffering with arthritis (and at 30 I hoped that I wasn't suffering with that yet), the brochure said it would improve joint mobility and build cartilage. Within about a month I discovered that I was no longer running in pain - I hadn't changed anything apart from taking EverFlex and I strongly believe that it has helped me carry on doing what I love and I even ran half a marathon this year and my knees didn't even twinge. I would definitely recommend it to all sportspeople.
